NEWCASTLE - EMLYN URBAN DISTRICT COUNCIL.

SANITARY & SURVEY REPORT FOR THE YEAR 1925.

Mr. Chairman and Gentlemen,

I beg to submit my Annual Report upon the health and sanitary condition of the Urban District of Newcastle-Emlyn for the year ending 31st December, 1925.

The district is mainly composed of the small agricultural town of Newcastle-Emlyn. The population is 851 (1921 Census). The Rateable Value is £2,854, and the Assessable Value £2,751. The Sum represented by a penny rate is £10.

There is no industry of importance in the district.

DEATHS.—13 were registered as compared with 25 in 1924. This gives a death rate of 15.3 per 1000 as compared with 31.2 per 1000 in 1924, and 11.7 per 1000 in 1923.

CHIEF CAUSES OF DEATH:

2	died from	Tuberculosis.
2	" "	Bronchitis.
2	" "	Heart Disease.

INFANTILE MORTALITY.—

I am pleased to report that no deaths under one year occurred.

BIRTHS.—7 Births were registered during the year (4 males & 3 females) this gives a birth rate of 8.2 per 1000 as compared with 11.0 per 1000 in 1924. One birth was illegitimate.

HOSPITAL.—There is no Hospital in the district, the nearest being at Cardigan, a distance of 10 miles. This Hospital was opened in July 1922, and is a great boon to the district. It is to be hoped that it will receive every support and encouragement from the general public.

ZYMOTIC DISEASES.—I am glad to report that the district has been practically free from infectious diseases during the year. One notification of Scarlet Fever was received, all precautions were taken in this case.

WATER SUPPLY.—The water which is of excellent quality is derived from Springs, the water being stored in two Reservoirs. The supply is barely sufficient for domestic purposes, and the Council are taking steps to increase the supply.

DRAINAGE.—There is a modified Drainage Scheme, which is on the whole quite satisfactory. Several extensions and improvements have been carried out during the last five years, and an increasing number of Closets of the pail type have been put on a proper water carriage system.

Three Public Lavatories have also been erected by the Council.

DUMPING GROUND.— Three years ago the Council formed and fenced in a Dumping Ground. This is being increasingly used and is proving a great convenience to the general public. Some refuse, however, is still being deposited on the banks and in the River Teify. The Council should make some effort to assist the public in the removal of refuse to the dumping ground periodically.

HOUSING.— The General Standard of the greater part of houses in the area is above the average for a country town. Housing progress during the last five years has been as follows :—

New Houses. Under the 1919 Act (Addison Scheme)	1.
By private enterprise.	3.
Total	4.
Houses rebuilt	7.
Houses having undergone extensive improvements	6.

HOUSING INSPECTIONS.— 12 Inspections for housing defects under the Public Health Acts were made during the year. 6 Houses were found not to be in all respects reasonably fit for human habitation. In these cases informal notices were served requiring the repairs to be carried out and the defects were duly remedied by the owners.

Two of the new houses built by private enterprise referred to above were built during the year.

SCHOOLS.— There is only one Elementary School in the district, and the sanitary condition and water supply is in a satisfactory state.

FOOD.— The Milk supply is satisfactory. In every case the Dairies should be kept cool and well ventilated. Two Dairies are registered under the Contagious Diseases Animals Act, 1886, and the Milk Dairies Amendment Act 1922.

SLAUGHTER HOUSES.— There are two in the district, there being no public abattoir. these are in a satisfactory state.

INFANT WELFARE CLINIC.— There is not as yet one been set up in the district. The Local District Nurse acting under the County Health Authority visits all Nursing Mothers and instructs them "how to rear a Baby." No cases of Puerperal Fever, or Ophthalmia Neonatorum were reported during the year, and the health of Mothers and Infants was satisfactory.

NUISANCES.— Notices to abate nuisances have been complied with.

PUBLIC HEALTH OFFICERS.— The Public Health Officers include one Medical Officer of Health and one Qualified Sanitary Inspector. The Inspector is also Surveyor to the Council. Both Officers are engaged in a similar capacity by the Newcastle in Emlyn R. D. C.

I take this opportunity to thank your Sanitary Inspector, and Mr. James Williams for the way they have carried out their duties and for their help to me.

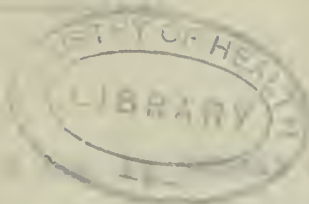

I beg to remain,

Your obedient servant,

D. G. LLOYD.

M. R. C. S., L. R. C. P.

M. O. H. for the Newcastle-Emlyn Urban District.

THE NEWCASTLE EMLYN URBAN DISTRICT COUNCIL.

SUPPLEMENTARY

SANITARY AND SURVEY REPORT FOR THE YEAR 1925.

THE ASSISTANT SECRETARY OF THE INTERIOR
DEPARTMENT OF THE INTERIOR

WASHINGTON, D. C.

RECEIVED AND FORWARDED FOR THE YEAR 1901

1
THE NEWCASTLE EMMLYN URBAN DISTRICT COUNCIL.

Supplementary

Sanitary and Survey Report for the Year 1925

Mr. Chairman and Gentlemen,

I beg to submit a Supplementary Sanitary and Survey Report for the Year 1925 as requested by the Ministry of Health.

Public Health Meat Regulations. There are no Stalls or Stores for the sale of Meat within the District.

The inspection of Carcases, meat exposed for sale, vehicles, etc is being efficiently carried out by the Sanitary Inspector. There are only two Slaughterhouses within the area and these are private Slaughterhouses. These were not registered as at December 1925 (now registered).

There are two small Bakehouses in the district. These are periodically inspected and are kept in a satisfactory sanitary condition. Most housewives in the district bake their own bread consequently there is no great demand for Baker's bread. The number of Registered Milk Retailers in the area is two, the town is further supplied by one Milk Vendor from outside the district. The Cowsheds and Dairies are periodically inspected by the Sanitary Inspector, they are kept clean and good wholesome milk is being supplied. The Sanitary condition of the Dairies and Cowsheds is good. Steps have been taken by the Sanitary Inspector regarding certain structural defects and these are being remedied.

The Local District Nurse acting under the County Health Authority makes visits in all cases of sickness and also visits expectant and nursing mothers and gives instructions etc. In addition to the Housing Inspections referred to in the Report the Sanitary Inspector makes a systematic weekly

/inspection

Summary and Survey Report for the year 1955

Mr. Tolson and Mr. Boardman,

I am to submit a summary

Summary and Survey Report for the year 1955 as requested

of the Bureau of Investigation.

Initial Review of the Report. There are no errors or

omissions in the report of the Bureau of Investigation.

The information of the report, which is correct for the year 1955,

is being officially carried out by the Bureau of Investigation.

There are only two discrepancies between the report and the

the original information. These were not reflected in the

Summary Report (see page 1).

There are two small discrepancies in the report. These are

officially reported and are made in a summary report.

Official. The discrepancies in the report are as follows:

First discrepancy: There is no direct demand for the year 1955.

The number of registered vehicles in the year 1955 is 1,200.

Second discrepancy: The number of registered vehicles in the year 1955 is 1,200.

The number of registered vehicles in the year 1955 is 1,200.

Reported by the Bureau of Investigation, 1955 and 1956.

The number of registered vehicles in the year 1955 is 1,200.

Official. The number of registered vehicles in the year 1955 is 1,200.

Official. The number of registered vehicles in the year 1955 is 1,200.

Official. The number of registered vehicles in the year 1955 is 1,200.

The number of registered vehicles in the year 1955 is 1,200.

Official. The number of registered vehicles in the year 1955 is 1,200.

Official. The number of registered vehicles in the year 1955 is 1,200.

Official. The number of registered vehicles in the year 1955 is 1,200.

Official. The number of registered vehicles in the year 1955 is 1,200.

Official.

inspection of the Town. Inspections of Slaughterhouses, Cowsheds and Dairies, Bakehouses and Shops are made together with inspections under the 1875 Public Health Act in regard to nuisances etc. The Sanitary Inspector is also responsible for the drainage in the Town and for all improvements and extensions made to same.

For the last five years the district has been singularly free from all notifiable diseases. There are no facilities available in the district for disinfecting persons. The Sanitary Inspector disinfects all premises after cases of infectious diseases and fatal cases of tuberculosis with Formalin Sprayer and formalin fumigation.

The causes of Deaths for the Year were as follows:-

Tuberculosis	2
Bronchitis	2
Heart Disease	2
Nephritis	2
Influenza	2
Senile Decay	3

The amount expended in Poor Law Relief for the Year was £108.18.0.

I beg to remain,

Your obedient Servant,

D.G.Lloyd. M.R.C.S. L.R.C.P.

M.O.H. for the Newcastle Emlyn Urban District.
